My form looks something like this: A: Yes, there is! If you look at the formly-formly code, you'll see there is a formly-attribute. A vibrant and vast civil society should be encouraged to get involved in a participatory democracy. The opportunity for inclusion and participation by individuals, groups and civil society in the political arena is the key element to achieve peace and social stability in the country. The so-called basic freedoms of the country's population are therefore, in one sense, already fulfilled, but in another they are still to some extent fragile and dependent on the peaceful environment. In particular, it is crucial for leaders to be in full control of their country's huge natural resources, which will be of key importance for the future of the country. A stable and just economic future for the Congolese people is also, however, dependent on a peaceful environment and strong government institutions. The situation in which there are democratic institutions, but leaders are still in power who cannot be democratically elected and do not enjoy broad public support, is still a reality in many parts of the country.
